Commission	
2000HR Service	Completed
1000V Tested	Completed

Sandvik DS420

Pioneer in cable bolting

Sandvik DS420 is a sophisticated cable bolting jumbo for rock re-inforcement in underground mines and tunnels with small and medium cross sections.

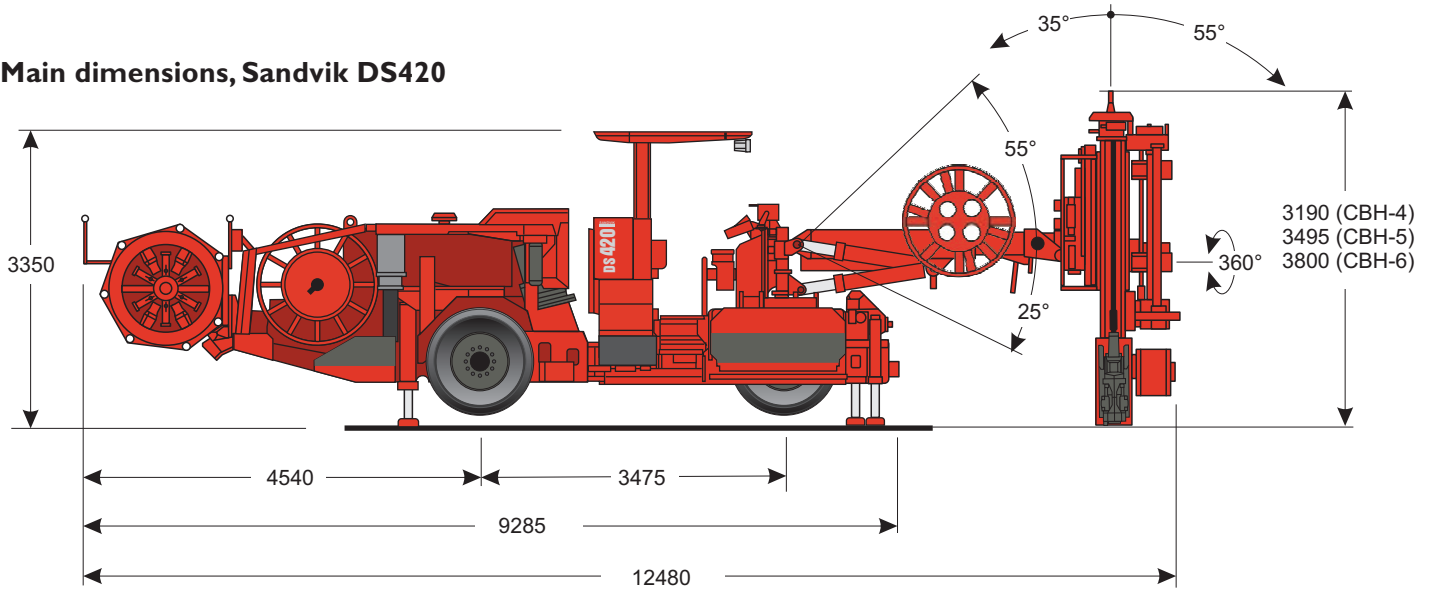

Sandvik has the longest experience in making cable bolting rigs on the market, with more than fifty units delivered around the world. This unit is a combination of proven longhole drill components and innovative bolting solutions.

The full bolting cycle can be done safely by one operator located under the canopy or in soundproof, air-conditioned cabin. The correct water/cement ratio and hole location can be easily controlled by the operator. Automatic grout hose washing, bolting head oiler and easy mixer cleaning of the machine minimize maintenance time. The onboard instrumentation with depth measurement for hole length, cement hose and steel strand ensures high quality, long-lasting end result.

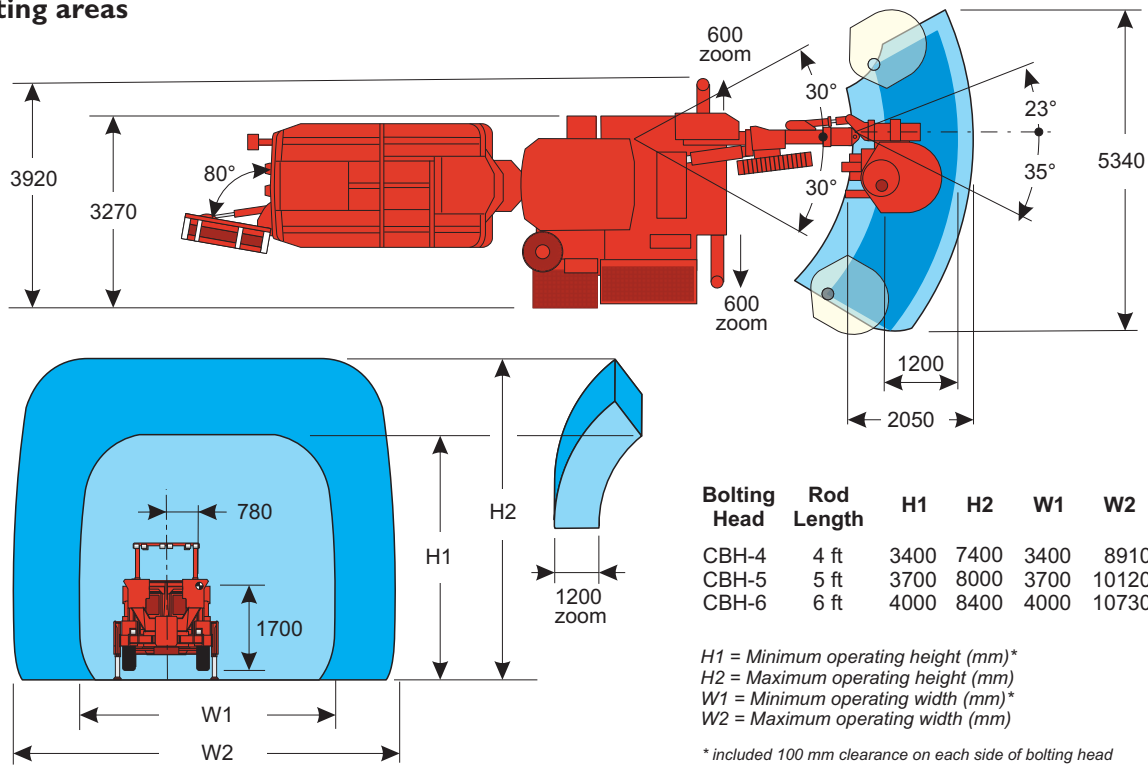

Available features

- Max. cable bolt length 25 m
- Air-conditioned, soundproof cabin
- TC7 carrier with excellent serviceability

Main dimensions, Sandvik DS420

Bolting areas

Sandvik DS420 series products

Model	Min drift size (height x width) / m (ft)	Bolt type	Bolt length / m (ft)	Working height / m (ft)	Canopy / cabin
